IDEC The origins

Previous Metadata catalogue

- http://catalegidec.icgc.cat
- Galdós INDICIO EbRIM
- OASIS ebXML Registry Information Model v3.0
- Ad-hoc user interface
- ~ 129.000 Monolingual metadata (ca, es, en)
- ISO 19139:2007
- Lack of update

IDEC – Current SDI Structure

ide.cat

IDEC – Current SDI Catalogue

- Access to the Catalogue
 https://www.ide.cat/en/catalogue

 Based on GeoNetwork v3.0.6 (2018)
- CSW Service (GetCapabilities)
 https://www.ide.cat/servei/catalunya/cataleg-idec/csw?

IDEC – Why GeoNetwork?

- Web interface, visual design
- Customizable user interface
- Integration of metadata editing and management
- Support to multilingual metadata ca, es, en
- Implementation of different metadata profiles
- Validation tools (XML, INSPIRE)
- Metadata templates
- Tools for connecting and federating other SDI catalogues

GeoNetwork Catalogue – Filtering Official Data

RCC - Registre Cartogràfic de Catalunya

- Filtering for metadata corresponding to Official data sets.
- Metadata view: Official data sets are appropriately highlighted.

Federation of SDI Nodes

Regional catalogue:

- Infraestructura de Dades Espacials de Catalunya (IDEC)
 - Responsible Organization: Institut Cartogràfic i Geològic de Catalunya (ICGC).
 - CSW Service:

https://www.ide.cat/servei/catalunya/cataleg-idec/csw?Request=GetCapabilities&Service=CSW&Language=spa

Local Catalogues:

- SDI Geoportal of Barcelona province (IDEBarcelona)
 - Responsible Organization: Diputación de Barcelona (DIBA).
 - CSW Service:

http://sitmun.diba.cat/csw/servlet?request=GetCapabilities&service=CSW&version=2.0.2

- SDI Geoportal of Barcelona council (Geoportalbon)
 - Responsible Organization: Ajuntament de Barcelona.
 - CSW Service:

http://w133.bcn.cat/CSWAJBCN/service.svc/get?request=GetCapabilities&service=CSW

Federation of Open Data Nodes

Open Data

Summary of our experience

- Very positive feedback on multilingual metadata support.
- Use of editor is not easy but gets better if templates are used.
- GeoNetwork documentation is improvable.
- Complexity of customized XML schemas and profiles.
- Difficulties to integrate such kind of customizations in the functionality of the catalogue. Also when facing GeoNetwork updates.
- Internal organization processes (e.g. official data workflow) are not easily integrable.
- Some features (e.g. harvesting) yet to be explored.
- Willing to migrate metadata to INSPIRE TG 2.0 and face an updated GeoNetwork version (3.10) soon.

Suggestions for GeoNetwork improvement

- ISO dates (creation / revision / publication) are not always enough to manage internal organization processes - Possible integration in the underlying database.
- Make possible customization of faceted search based on specific user categories through UI.
- UI needs to be improved, specially the metadata editor.
- Simplify terminology of UI (i.e. not ISO-based), specially in the metadata editor, to make it accessible to non-technical users.
- Independency of metadata content storage from delivery format would probably be an asset (e.g. ISO XML).

Thank you for your attention!
